Subject Index

Volume 37, January–June 2001

A

Acetazolamide
Renal Interstitial ATP Responses to Changes in Arterial Pressure During Alterations in Tubuloglomerular Feedback Activity, 753

Acetylcholine
Endothelial Dysfunction and Salt-Sensitive Hypertension in Spontaneously Diabetic Goto-Kakizaki Rats, 433

Adeno-associated virus
Attenuation of Hypertension and Heart Hypertrophy by Adeno-Associated Virus Delivering Angiotensinogen Antisense, 376

Adenosine
A_{2B} Receptors Mediate the Antimitogenic Effects of Adenosine in Cardiac Fibroblasts, 716
Endogenous Cyclic AMP-Adenosine Pathway Regulates Cardiac Fibroblast Growth, 1095
Renal Interstitial ATP Responses to Changes in Arterial Pressure During Alterations in Tubuloglomerular Feedback Activity, 753

Adipocytes
Angiotensin II and Its Metabolites Stimulate PAI-1 Protein Release From Human Adipocytes in Primary Culture, 1336
Norepinephrine Reuptake Is Impaired in Skeletal Muscle of Hypertensive Rats In Vivo, 698

Adrenergic receptor blockers
Effect of Antihypertensive Therapy on Renal Artery Structure in Type 2 Diabetic Rats With Hypertension, 1273
Hypothesis: β-Adrenergic Receptor Blockers and Weight Gain: A Systematic Analysis, 250
Mechanisms of Carvedilol Action in Human Congestive Heart Failure, 1216

Adrenomedullin
Alterations of Intrarenal Adrenomedullin and Its Receptor System in Heart Failure Rats, 216
Effect of Adrenomedullin on Placental Arteries in Normal and Preeclamptic Pregnancies, 227
Endothelin-1-Independent and Angiotensin II-Independent Induction of Adrenomedullin Gene Expression, 84
Hypotensive and Natriuretic Actions of Adrenomedullin in Subjects With Chronic Renal Impairment, 1279

Age
Relation of Age to Left Ventricular Function and Systemic Hemodynamics in Uncomplicated Mild Hypertension, 1404

Aging
Editorial Commentary: Aging and Systolic Hypertension: Cluster Patterns and Problem-Solving Strategies to Answer the Genetic Riddle, 1067
Effects of Blood Pressure, Smoking, and Their Interaction on Carotid Artery Structure and Function, 6
Excess Growth and Apoptosis: Is Hypertension a Case of Accelerated Aging of Cardiovascular Cells? 760
Hemodynamic Overload-Induced Activation of Myocardial Mitogen-Activated Protein Kinases In Vivo: Augmented Responses in Young Spontaneously Hypertensive Rats and Diminished Responses in Aged Fischer 344 Rats, 52
Hypothesis: Pulse Pressure and Human Longevity, 1060
Superoxide Excess in Hypertension and Aging: A Common Cause of Endothelial Dysfunction, 529
Telomere Length as an Indicator of Biological Aging: The Gender Effect and Relation With Pulse Pressure and Pulse Wave Velocity, 381

Albuminuria
Expression and Function of Peroxisome Proliferator-Activated Receptor-γ in Mesangial Cells, 722
Polymorphisms in the *hANP* (Human Atrial Natriuretic Peptide) Gene, Albuminuria, and Hypertension, 1416

Alcohol
Alcohol Consumption and the Incidence of Hypertension: The Atherosclerosis Risk in Communities Study, 1242

Aldosterone
Antifibrotic Effects of N-Acetyl-Seryl-Aspartyl-Lysyl-Proline on the Heart and Kidney in Aldosterone-Salt Hypertensive Rats, 794
Arterial Pressure, Left Ventricular Mass, and Aldosterone in Essential Hypertension, 845
Captopril Suppression vs Salt Loading in Confirming Primary Aldosteronism, 1440
K^+ Depletion and the Progression of Hypertensive Disease or Heart Failure: The Pathogenic Role of Diuretic-Induced Aldosterone Secretion, 806
Workshop: Mechanisms and Cardiovascular Damage in Hypertension, 594

Amino acid
Effect of N-Acetyl-Seryl-Aspartyl-Lysyl-Proline on DNA and Collagen Synthesis in Rat Cardiac Fibroblasts, 827
Identification of Peptides That Target the Endothelial Cell-Specific LOX-1 Receptor, 449

Angioplasty
ACE D/I Polymorphism and Incidence of Post-PTCA Restenosis: A Prospective, Angiography-Based Evaluation, 851

Angiotensin
Angiotensin-(1-7) Does Not Affect Vasodilator or TPA Responses to Bradykinin in Human Forearm, 1136
Angiotensin-(1-7)-Stimulated Nitric Oxide and Superoxide Release From Endothelial Cells, 72
Angiotensin II and Its Metabolites Stimulate PAI-1 Protein Release From Human Adipocytes in Primary Culture, 1336
Angiotensin II Induces Migration and Pyk2/Paxillin Phosphorylation of Human Monocytes, 587
Effects of an Angiotensin-Converting Enzyme Inhibitor and a β-Blocker on Cerebral Arteriolar Dilatation in Hypertensive Rats, 1388
HMG-CoA Reductase Inhibitors Improve Endothelial Dysfunction in Normocholesterolemic Hypertension via Reduced Production of Reactive Oxygen Species, 1450
20-Hydroxyeicosatetraenoic Acid Mediates Angiotensin II-Induced Phospholipase D Activation in Vascular Smooth Muscle Cells, 623
Mineralocorticoid Receptor Affects AP-1 and Nuclear Factor-κB Activation in Angiotensin II-Induced Cardiac Injury, 787
Neural Mechanisms Subserving Central Angiotensinergic Influences on Plasma Renin in Sheep, 1375
Pharmacodynamic Contribution to the Vasodilator Effect of Chronic AT_1 Receptor Blockade in SHR, 91
Potentiation of Bradykinin by Angiotensin-(1-7) on Arterioles of Spontaneously Hypertensive Rats Studied In Vivo, 703
T+31C Polymorphism of Angiotensinogen Gene and Essential Hypertension, 281
Workshop: Mechanisms and Cardiovascular Damage in Hypertension, 594

Angiotensin antagonist
Angiotensin Type 1 Receptor Antagonism and ACE Inhibition Produce Similar Renoprotection in N^{ω}-Nitro-L-Arginine Methyl Ester/Spontaneously Hypertensive Rats, 1262
Sodium Intake Influences Hemodynamic and Neural Responses to Angiotensin Receptor Blockade in Rostral Ventrolateral Medulla, 1114

Angiotensin-converting enzyme
ACE D/I Polymorphism and Incidence of Post-PTCA Restenosis: A Prospective, Angiography-Based Evaluation, 851
Angiotensin-(1-7) Does Not Affect Vasodilator or TPA Responses to Bradykinin in Human Forearm, 1136
Endothelial Dysfunction and Salt-Sensitive Hypertension in Spontaneously Diabetic Goto-Kakizaki Rats, 433

Angiotensin-converting enzyme inhibitors
Angiotensin Type 1 Receptor Antagonism and ACE Inhibition Produce Similar Renoprotection in N^{ω}-Nitro-L-Arginine Methyl Ester/Spontaneously Hypertensive Rats, 1262

Baroreflex Improvement in SHR after ACE Inhibition Involves Angiotensin-(1-7), 1309
Effect of *N*-Acetyl-Seryl-Aspartyl-Lysyl-Proline on DNA and Collagen Synthesis in Rat Cardiac Fibroblasts, 827
Effect of Antihypertensive Therapy on Renal Artery Structure in Type 2 Diabetic Rats With Hypertension, 1273
Effects of Angiotensin-Converting Enzyme Inhibitor and Angiotensin Type 1 Receptor Antagonist in Deoxycorticosterone Acetate-Salt Hypertensive Mice Lacking Ren-2 Gene, 974
Expression of Ca^{2+} Transport Genes in Platelets and Endothelial Cells in Hypertension, 135
Inhibition of Neointima by Angiotensin-Converting Enzyme Inhibitor in Porcine Coronary Artery Balloon-Injury Model, 270
Left Ventricle and Arteries: Structure, Function, Hormones, and Disease, 346
Role of Angiotensin and Its Inhibition in Hypertension, Ischemic Heart Disease, and Heart Failure, 342
Vascular Effects of ACE Inhibition Independent of the Renin-Angiotensin System in Hypertensive Renovascular Disease: A Randomized, Double-Blind, Crossover Trial, 40
Vasopeptidase Inhibition Prevents Endothelial Dysfunction of Resistance Arteries in Salt-Sensitive Hypertension in Comparison With Single ACE Inhibition, 28

Angiotensin II
Activation of NF-κB in Tubular Epithelial Cells of Rats With Intense Proteinuria: Role of Angiotensin II and Endothelin-1, 1171
Angiotensin-(1-7) Downregulates the Angiotensin II Type 1 Receptor in Vascular Smooth Muscle Cells, 1141
AT_1 Antisense Distinguishes Receptors Mediating Angiotensin II Actions in Solitary Tract Nucleus, 1292
Angiotensin II-Induced Hypertension in Bradykinin B_2 Receptor Knockout Mice, 967
Angiotensin II Relaxes Microvessels Via the AT_2 Receptor and Ca^{2+}-Activated K^+ (BK_{Ca}) Channels, 301
Angiotensin II Signaling to Phospholipase D in Renal Microvascular Smooth Muscle Cells in SHR, 635
Antisense Inhibition of Thyrotropin-Releasing Hormone Reduces Arterial Blood Pressure in Spontaneously Hypertensive Rats, 365
Apoptosis Is Not Increased in Myocardium Overexpressing Type 2 Angiotensin II Receptor in Transgenic Mice, 1394
Are Angiotensin II Receptor Antagonists Safe in Patients With Previous Angiotensin-Converting Enzyme Inhibitor-Induced Angioedema?, e1
Cardiomyocytes Bind and Activate Native Human Prorenin: Role of Soluble Mannose 6-Phosphate Receptors, 710
Coronary Hemodynamic and Ventricular Responses to Angiotensin Type 1 Receptor Inhibition in SHR: Interaction With Angiotensin Type 2 Receptors, 1399
Differentiation of Brain Angiotensin Type 1a and 1b Receptor mRNAs: A Specific Effect of Dehydration, 692
Editorial Commentary: Regulation of Cardiac Collagen: Angiotensin and Cross-Talk With Local Growth Factors, 841
Effect of Chronic Blockade of the Kallikrein-Kinin System on the Development of Hypertension in Rats, 121
Effect of Extracellular Matrix Elements on Angiotensin II-Induced Calcium Release in Vascular Smooth Muscle Cells From Normotensive and Hypertensive Rats, 1465
Effect of Insulin and Angiotensin II on Cell Calcium in Human Skin Fibroblasts, 1486
Effect of Valsartan on Angiotensin II-Induced Plasminogen Activator Inhibitor-1 Biosynthesis in Arterial Smooth Muscle Cells, 961
Endothelial Dysfunction and Xanthine Oxidoreductase Activity in Rats With Human Renin and Angiotensinogen Genes, 414
Endothelin-1-Independent and Angiotensin II-Independent Induction of Adrenomedullin Gene Expression, 84
Enhancement of Angiotensinogen Expression in Angiotensin II-Dependent Hypertension, 1329
Expression and Distribution of NOS1 and NOS3 in the Myocardium of Angiotensin II-Infused Rats, 1423
Gender Differences in the Regulation of Blood Pressure, 1199
Hypotensive and Natriuretic Actions of Adrenomedullin in Subjects With Chronic Renal Impairment, 1279
Increased Oxidative Stress in Experimental Renovascular Hypertension, 541
Paradoxical Regulation of Short Promoter Human Renin Transgene by Angiotensin II, 403
Role of Brain Angiotensin II on Somatosensory-Induced Antinatriuresis in Hypertensive Rats, 1369
Role of Myocytes in Myocardial Collagen Production, 833
Signaling Events Mediating the Additive Effects of Oleic Acid and Angiotensin II on Vascular Smooth Muscle Cell Migration, 308
Sodium Intake Influences Hemodynamic and Neural Responses to Angiotensin Receptor Blockade in Rostral Ventrolateral Medulla, 1114
Systemic and Regional Hemodynamic Responses to Tempol in Angiotensin II-Infused Hypertensive Rats, 77
Tyrosine Kinase Involvement in Renal Arteriolar Constrictor Responses to Angiotensin II, 569
Upregulated Expression of Rat Heart Intercellular Adhesion Molecule-1 in Angiotensin II- but Not Phenylephrine-Induced Hypertension, 58
Workshop: Hypertension and Cardiovascular Risk Factors: Role of the Angiotensin II-Nitric Oxide Interaction, 767

Angiotensinogen
Angiotensinogen Polymorphisms and Elevated Blood Pressure in the General Population: The Copenhagen City Heart Study, 875
Attenuation of Hypertension and Heart Hypertrophy by Adeno-Associated Virus Delivering Angiotensinogen Antisense, 376
Enhancement of Angiotensinogen Expression in Angiotensin II-Dependent Hypertension, 1329
Responses to Central Na^+ and Ouabain Are Attenuated in Transgenic Rats Deficient in Brain Angiotensinogen, 683

Animals, transgenic
Workshop: Mechanisms and Cardiovascular Damage in Hypertension, 594

Antibodies
Antibodies to Lysophosphatidylcholine Are Decreased in Borderline Hypertension, 154
Differential Distribution of Bradykinin B_2 Receptors in the Rat and Human Cardiovascular System, 110

Antihypertensive agents
Baseline Characteristics of Participants in the Antihypertensive and Lipid Lowering Treatment to Prevent Heart Attack Trial (ALLHAT), 19
Cancer Incidence in Hypertensive Patients in North Karelia, Finland, 1251
Vasoactive Drugs Influence Aortic Augmentation Index Independently of Pulse-Wave Velocity in Healthy Men, 1429

Antioxidants
Ascorbic Acid Status and Subsequent Diastolic and Systolic Blood Pressure, 261
Editorial Commentary: BBs and Bullets: The Impact of Dietary Factors on Blood Pressure, 268
Nifedipine Increases Endothelial Nitric Oxide Bioavailability by Antioxidative Mechanisms, 240
Restoration of Nitric Oxide Availability After Calcium Antagonist Treatment in Essential Hypertension, 943

Antisense elements
Antisense Inhibition of Brain Renin-Angiotensin System Decreased Blood Pressure in Chronic 2-Kidney, 1 Clip Hypertensive Rats, 371
Antisense Inhibition of Thyrotropin-Releasing Hormone Reduces Arterial Blood Pressure in Spontaneously Hypertensive Rats, 365
Attenuation of Hypertension and Heart Hypertrophy by Adeno-Associated Virus Delivering Angiotensinogen Antisense, 376
The Future of Hypertension Therapy: Sense, Antisense, or Nonsense?, 357
Responses to Central Na^+ and Ouabain Are Attenuated in Transgenic Rats Deficient in Brain Angiotensinogen, 683

Aorta
Aortic Root Dilatation at Sinuses of Valsalva and Aortic Regurgitation in Hypertensive and Normotensive Subjects: The Hypertension Genetic Epidemiology Network Study, 1229
Endothelin Antagonism Uncovers Insulin-Mediated Vasorelaxation In Vitro and In Vivo, 328
ET_A Receptor Antagonist Prevents Blood Pressure Elevation and Vascular Remodeling in Aldosterone-Infused Rats, 1444
Impaired Insulin-like Growth Factor I Vasorelaxant Effects in Hypertension, 1480

Peripheral "Oscillatory" Compliance Is Associated With Aortic Augmentation Index, 1434
Telomere Length as an Indicator of Biological Aging: The Gender Effect and Relation With Pulse Pressure and Pulse Wave Velocity, 381
Vascular Stiffness in Women With Systemic Lupus Erythematosus, 1075
Vasoactive Drugs Influence Aortic Augmentation Index Independently of Pulse-Wave Velocity in Healthy Men, 1429

Apnea
Role of Endothelin in Intermittent Hypoxia-Induced Hypertension, 511

Apoptosis
Apoptosis Is Not Increased in Myocardium Overexpressing Type 2 Angiotensin II Receptor in Transgenic Mice, 1394
Contribution of Bcl-2, but Not Bcl-xL and Bax, to Antiapoptotic Actions of Hepatocyte Growth Factor in Hypoxia-Conditioned Human Endothelial Cells, 1341
Excess Growth and Apoptosis: Is Hypertension a Case of Accelerated Aging of Cardiovascular Cells?, 760
Mitogenic and Antiapoptotic Actions of Hepatocyte Growth Factor Through ERK, STAT3, and Akt in Endothelial Cells, 581
Nuclear Factor 1 Is a Negative Regulator of gadd153 Gene Expression in Vascular Smooth Muscle Cells, 419

Arachidonic acid
Endothelial Dysfunction and Xanthine Oxidoreductase Activity in Rats With Human Renin and Angiotensinogen Genes, 414
Epoxyeicosatrienoic Acid-Mediated Renal Vasodilation to Arachidonic Acid Is Enhanced in SHR, 887
20-Hydroxyeicosatetraenoic Acid Mediates Angiotensin II-Induced Phospholipase D Activation in Vascular Smooth Muscle Cells, 623

Arrhythmia
Mortality After Coronary Artery Occlusion in Different Models of Cardiac Hypertrophy in Rats, 209
T Wave Alternans and Ventricular Arrhythmias in Arterial Hypertension, 199

Arterial pressure
Peripheral "Oscillatory" Compliance Is Associated With Aortic Augmentation Index, 1434
Quantification of Mechanical and Neural Components of Vagal Baroreflex in Humans, 1362
Role of Endothelin B Receptors in Enhancing Endothelium-Dependent Nitric Oxide-Mediated Vascular Relaxation During High Salt Diet, 516

Arteries
Aortic Stiffness Is an Independent Predictor of All-Cause and Cardiovascular Mortality in Hypertensive Patients, 1236
A Comparison Between Systolic and Diastolic Pulse Contour Analysis in the Evaluation of Arterial Stiffness, e15
Differential Expression of Voltage-Gated K^+ Channel Genes in Arteries From Spontaneously Hypertensive and Wistar-Kyoto Rats, 1315
Effect of Adrenomedullin on Placental Arteries in Normal and Preeclamptic Pregnancies, 227
Effect of Antihypertensive Therapy on Renal Artery Structure in Type 2 Diabetic Rats With Hypertension, 1273
Effect of Lead on Nitric Oxide Synthase Expression in Coronary Enuothelial Cells: Role of Superoxide, 223
Estradiol Metabolites Inhibit Endothelin Synthesis by an Estrogen Receptor-Independent Mechanism, 640
Fenestrations of the Carotid Internal Elastic Lamina and Structural Adaptation in Stroke-Prone Spontaneously Hypertensive Rats, 1101
Left Ventricle and Arteries: Structure, Function, Hormones, and Disease, 346
p38 MAP Kinase Regulates Vascular Smooth Muscle Cell Collagen Synthesis by Angiotensin II in SHR But Not in WKY, 574
Pulse Pressure, Aortic Reactivity, and Endothelium Dysfunction in Old Hypertensive Rats, 313
Src Tyrosine Kinases and Extracellular Signal-Regulated Kinase 1/2 Mitogen-Activated Protein Kinases Mediate Pressure-Induced C-Fos Expression in Cannulated Rat Mesenteric Small Arteries, 955
Structural Vascular Changes in Hypertension: Role of Angiotensin II, Dietary Sodium Supplementation, and Sympathetic Stimulation, Alone and in Combination in Rats, 255
Vasopeptidase Inhibition Prevents Endothelial Dysfunction of Resistance Arteries in Salt-Sensitive Hypertension in Comparison With Single ACE Inhibition, 28

Arterioles
Differential Inhibition of Functional Dilation of Small Arterioles by Indomethacin and Glibenclamide, 599
Effects of an Angiotensin-Converting Enzyme Inhibitor and a β-Blocker on Cerebral Arteriolar Dilatation in Hypertensive Rats, 1388
Superoxide Inhibits Neuronal Nitric Oxide Synthase Influences on Afferent Arterioles in Spontaneously Hypertensive Rats, 630
Tyrosine Kinase Involvement in Renal Arteriolar Constrictor Responses to Angiotensin II, 569

Ascorbic acid
Ascorbic Acid Status and Subsequent Diastolic and Systolic Blood Pressure, 261
Editorial Commentary: BBs and Bullets: The Impact of Dietary Factors on Blood Pressure, 268

Atenolol
Baseline Characteristics and Early Blood Pressure Control in the CONVINCE Trial, 12

Atherosclerosis
Angiotensin II Induces Migration and Pyk2/Paxillin Phosphorylation of Human Monocytes, 587
Antibodies to Lysophosphatidylcholine Are Decreased in Borderline Hypertension, 154

Atrial natriuretic factor
Polymorphisms in the *hANP* (Human Atrial Natriuretic Peptide) Gene, Albuminuria, and Hypertension, 1416
Vasopeptidase Inhibition Prevents Endothelial Dysfunction of Resistance Arteries in Salt-Sensitive Hypertension in Comparison With Single ACE Inhibition, 28

Autoregulation
Comparative Effects of Selective T- and L-Type Calcium Channel Blockers in the Remnant Kidney Model, 1268
Effects of an Angiotensin-Converting Enzyme Inhibitor and a β-Blocker on Cerebral Arteriolar Dilatation in Hypertensive Rats, 1388

B

Baroreceptors
γ-Aminobutyric $Acid_B$ Receptor-Mediated Responses in the Nucleus Tractus Solitarius Are Altered in Acute and Chronic Hypertension, 619
Baroreflex Improvement in SHR after ACE Inhibition Involves Angiotensin-(1-7), 1309
Dynamic Analysis of Renal Nerve Activity Responses to Baroreceptor Denervation in Hypertensive Rats, 1153

Baroreflex
Alterations in Blood Pressure and Heart Rate Variability in Transgenic Rats With Low Brain Angiotensinogen, 408
Autonomic Function in Hypertensive and Normotensive Subjects: The Importance of Gender, 1351
Determinants of Spontaneous Baroreflex Sensitivity in a Healthy Working Population, 911
Genetic Influences on Baroreflex Function in Normal Twins, 907

Bicuculline
γ-Aminobutyric Acid (GABA)-A Function and Binding in the Paraventricular Nucleus of the Hypothalamus in Chronic Renal-Wrap Hypertension, 614

Blood flow
Angiotensin II-Induced Hypertension in Bradykinin B_2 Receptor Knockout Mice, 967
Combination of Hypercholesterolemia and Hypertension Augments Renal Function Abnormalities, 774

Blood pressure
β_2-Adrenergic Receptor Gene Variation and Hypertension in Subjects With Type 2 Diabetes, 1303
Alterations in Blood Pressure and Heart Rate Variability in Transgenic Rats With Low Brain Angiotensinogen, 408

Angiotensinogen Polymorphisms and Elevated Blood Pressure in the General Population: The Copenhagen City Heart Study, 875
Animal Model of Neuropathic Tachycardia Syndrome, 1357
Antisense Inhibition of Thyrotropin-Releasing Hormone Reduces Arterial Blood Pressure in Spontaneously Hypertensive Rats, 365
Ascorbic Acid Status and Subsequent Diastolic and Systolic Blood Pressure, 261
Association Between Smoking and Blood Pressure: Evidence From the Health Survey for England, 187
Brown Norway Chromosome 13 Confers Protection From High Salt to Consomic Dahl S Rat, 456
C825T Polymorphism of the G Protein β_3-Subunit and Antihypertensive Response to a Thiazide Diuretic, 739
Cancer Incidence in Hypertensive Patients in North Karelia, Finland, 1251
Cardiovascular Mortality in Hypertensive Men According to Presence of Associated Risk Factors, 1256
Comparative Effects of Selective T- and L-Type Calcium Channel Blockers in the Remnant Kidney Model, 1268
Coronary Hemodynamic and Ventricular Responses to Angiotensin Type 1 Receptor Inhibition in SHR: Interaction With Angiotensin Type 2 Receptors, 1399
A Defect in Glycogen Synthesis Characterizes Insulin Resistance in Hypertensive Patients With Type 2 Diabetes, 1492
Diabetes, Hypertension, and Cardiovascular Disease: An Update, 1053
Editorial Commentary: BBs and Bullets: The Impact of Dietary Factors on Blood Pressure, 268
Effect of Lead on Nitric Oxide Synthase Expression in Coronary Endothelial Cells: Role of Superoxide, 223
Effects of Blood Pressure, Smoking, and Their Interaction on Carotid Artery Structure and Function, 6
Effects of Smoking Cessation on Changes in Blood Pressure and Incidence of Hypertension: A 4-Year Follow-Up Study, 194
Evidence That Reduced Renal Medullary Nitric Oxide Synthase Activity of Dahl S Rats Enables Small Elevations of Arginine Vasopressin to Produce Sustained Hypertension, 524
Familial Factors of Blood Pressure and Adiposity Covariation, 928
Genetic Influences on Baroreflex Function in Normal Twins, 907
Genome-Wide Linkage Analysis of Pulse Pressure in Mexican Americans, 425
Inhibition of NO Synthesis Enhances Chronic Cardiovascular and Renal Actions of Leptin, 670
Mutations in the Na-Cl Cotransporter Reduce Blood Pressure in Humans, 1458
Nerve Growth Factor Enhances Calcitonin Gene-Related Peptide Expression in the Spontaneously Hypertensive Rat, 728
Nitric Oxide and Central Antihypertensive Drugs: One More Difference Between Catecholamines and Imidazolines, 246
Paradoxical Regulation of Short Promoter Human Renin Transgene by Angiotensin II, 403
Peripheral "Oscillatory" Compliance Is Associated With Aortic Augmentation Index, 1434
Pharmacodynamic Contribution to the Vasodilator Effect of Chronic AT_1 Receptor Blockade in SHR, 91
Predominance of Isolated Systolic Hypertension Among Middle-Aged and Elderly US Hypertensives: Analysis Based on National Health and Nutrition Examination Survey (NHANES) III, 869
Reversibility of Chronic Experimental Syndrome X by Diet Modification, 1323
Role of Endothelin and Isoprostanes in Slow Pressor Responses to Angiotensin II, 505
Salt Sensitivity, Pulse Pressure, and Death in Normal and Hypertensive Humans, 429
Selective Inhibition of the Renal Angiotensin Type 2 Receptor Increases Blood Pressure in Conscious Rats, 1285
Sodium-Lithium Countertransport Activity Is Linked to Chromosome 5 in Baboons, 398
Structure-Activity Relationships for the Hypertensinogenic Activity of Ouabain: Role of the Sugar and Lactone Ring, 472
Telomere Length as an Indicator of Biological Aging: The Gender Effect and Relation With Pulse Pressure and Pulse Wave Velocity, 381

Blood pressure monitoring, ambulatory
Dipping Status May Be Determined by Nocturnal Urination, 749

Blood vessels
Contribution of Bcl-2, but Not Bcl-xL and Bax, to Antiapoptotic Actions of Hepatocyte Growth Factor in Hypoxia-Conditioned Human Endothelial Cells, 1341
ET_A Receptor Antagonist Prevents Blood Pressure Elevation and Vascular Remodeling in Aldosterone-Infused Rats, 1444
Renin Gene Transfer Restores Angiogenesis and Vascular Endothelial Growth Factor Expression in Dahl S Rats, 386

Body mass index
Familial Factors of Blood Pressure and Adiposity Covariation, 928

Body weight
Effects of Smoking Cessation on Changes in Blood Pressure and Incidence of Hypertension: A 4-Year Follow-Up Study, 194
Hypothesis: β-Adrenergic Receptor Blockers and Weight Gain: A Systematic Analysis, 250

Bradykinin
Angiotensin-(1-7) Does Not Affect Vasodilator or TPA Responses to Bradykinin in Human Forearm, 1136
Angiotensin Type 1 Receptor Antagonism and ACE Inhibition Produce Similar Renoprotection in N^{ω}-Nitro-L-Arginine Methyl Ester/Spontaneously Hypertensive Rats, 1262
Differential Distribution of Bradykinin B_2 Receptors in the Rat and Human Cardiovascular System, 110
Interactive Effect of Ethnicity and ACE Insertion/Deletion Polymorphism on Vascular Reactivity, 46
Normal Blood Pressure and Renal Function in Mice Lacking the Bradykinin B_2 Receptor, 1473
Potentiation of Bradykinin by Angiotensin-(1-7) on Arterioles of Spontaneously Hypertensive Rats Studied In Vivo, 703
Role of Cyclooxygenase-2-Derived Metabolites and NO in Renal Response to Bradykinin, 129

Brain
Alterations in Blood Pressure and Heart Rate Variability in Transgenic Rats With Low Brain Angiotensinogen, 408
Angiotensin II Increases Vesicular Trafficking in Brain Neurons, 677
Antisense Inhibition of Brain Renin-Angiotensin System Decreased Blood Pressure in Chronic 2-Kidney, 1 Clip Hypertensive Rats, 371
Differentiation of Brain Angiotensin Type 1a and 1b Receptor mRNAs: A Specific Effect of Dehydration, 692
Neurovascular Contact of Cranial Nerve IX and X Root-Entry Zone in Hypertensive Patients, 176
Prevention of Hypertension by Irbesartan in Dahl S Rats Relates to Central Angiotensin II Type 1 Receptor Blockade, 981
Responses to Central Na^+ and Ouabain Are Attenuated in Transgenic Rats Deficient in Brain Angiotensinogen, 683
Role of Brain Angiotensin II on Somatosensory-Induced Antinatriuresis in Hypertensive Rats, 1369
Sodium Intake Influences Hemodynamic and Neural Responses to Angiotensin Receptor Blockade in Rostral Ventrolateral Medulla, 1114
Src and Rac Mediate Endothelin-1 and Lysophosphatidic Acid Stimulation of the Human Brain Natriuretic Peptide Promoter, 478
Tonic Excitatory Input to the Rostral Ventrolateral Medulla in Dahl Salt-Sensitive Rats, 687

Brefeldin A
Angiotensin II Signaling to Phospholipase D in Renal Microvascular Smooth Muscle cells in SHR, 635

C

Ca^{2+}-transporting ATPase
Expression of Ca^{2+} Transport Genes in Platelets and Endothelial Cells in Hypertension, 135

Calcitonin gene-related peptide
Nerve Growth Factor Enhances Calcitonin Gene-Related Peptide Expression in the Spontaneously Hypertensive Rat, 728

Calcium
Abnormal Platelet Function and Calcium Handling in Dahl Salt-Hypertensive Rats, 1129
Effect of Extracellular Matrix Elements on Angiotensin II-Induced Calcium Release in Vascular Smooth Muscle Cells From Normotensive and Hypertensive Rats, 1465
Effect of Insulin and Angiotensin II on Cell Calcium in Human Skin Fibroblasts, 1486

Endothelin-1 Enhances Eicosanoids-Induced Coronary Smooth Muscle Contraction by Activating Specific Protein Kinase C Isoforms, 497
Oxidized-LDL Enhances Coronary Vasoconstriction by Increasing the Activity of Protein Kinase C Isoforms α and ϵ, 561

Calcium antagonists
Lacidipine Prevents Endothelial Dysfunction in Salt-Loaded Stroke-Prone Hypertensive Rats, 1124
Nifedipine Increases Endothelial Nitric Oxide Bioavailability by Antioxidative Mechanisms, 240
Restoration of Nitric Oxide Availability After Calcium Antagonist Treatment in Essential Hypertension, 943

Calcium channel blockers
Lacidipine Prevents Endothelial Dysfunction in Salt-Loaded Stroke-Prone Hypertensive Rats, 1124
Vascular Effects of Progesterone: Role of Cellular Calcium Regulation, 142

Cancer
Cancer Incidence in Hypertensive Patients in North Karelia, Finland, 1251

Captopril
Captopril Suppression vs Salt Loading in Confirming Primary Aldosteronism, 1440
Differential Effect of Chronic Antihypertensive Treatment on Vascular Smooth Muscle Cell Phenotype in Spontaneously Hypertensive Rats, e4
Vasopeptidase Inhibition Exhibits Endothelial Protection in Salt-Induced Hypertension, 1108

Cardiac output
Endothelin-1-Independent and Angiotensin II-Independent Induction of Adrenomedullin Gene Expression, 84

Cardiovascular diseases
Aortic Stiffness Is an Independent Predictor of All-Cause and Cardiovascular Mortality in Hypertensive Patients, 1236
Diabetes, Hypertension, and Cardiovascular Disease: An Update, 1053
Estradiol Metabolites Inhibit Endothelin Synthesis by an Estrogen Receptor-Independent Mechanism, 640

Prognostic Significance of Serum Creatinine and Uric Acid in Older Chinese Patients With Isolated Systolic Hypertension, 1069
T+31C Polymorphism of Angiotensinogen Gene and Essential Hypertension, 281
Tissue Angiotensin and Pathobiology of Vascular Disease: A Unifying Hypothesis, 1047
Vascular Stiffness in Women With Systemic Lupus Erythematosus, 1075
Y-Chromosome Transfer Induces Changes in Blood Pressure and Blood Lipids in SHR, 1147

Carotid arteries
Effects of Blood Pressure, Smoking, and Their Interaction on Carotid Artery Structure and Function, 6
Nuclear Factor 1 Is a Negative Regulator of gadd153 Gene Expression in Vascular Smooth Muscle Cells, 419
Quantification of Mechanical and Neural Components of Vagal Baroreflex in Humans, 1362

Catecholamines
Autonomic Function in Hypertensive and Normotensive Subjects: The Importance of Gender, 1351
Central Orexin-A Augments Sympathoadrenal Outflow in Conscious Rabbits, 1382
Increased 2-Methoxyestradiol Production in Human Coronary Versus Aortic Vascular Cells, 658

Cell adhesion molecules
Upregulated Expression of Rat Heart Intercellular Adhesion Molecule-1 in Angiotensin II- but Not Phenylephrine-Induced Hypertension, 58

Cell cycle
Differential Effect of Chronic Antihypertensive Treatment on Vascular Smooth Muscle Cell Phenotype in Spontaneously Hypertensive Rats, e4

Central nervous system
Central Orexin-A Augments Sympathoadrenal Outflow in Conscious Rabbits, 1382
Nitric Oxide and Central Antihypertensive Drugs: One More Difference Between Catecholamines and Imidazolines, 246

Cholesterol
Combination of Hypercholesterolemia and Hypertension Augments Renal Function Abnormalities, 774
Y-Chromosome Transfer Induces Changes in Blood Pressure and Blood Lipids in SHR, 1147

Chromosome 5
Sodium-Lithium Countertransport Activity Is Linked to Chromosome 5 in Baboons, 398

Chromosome 13
Brown Norway Chromosome 13 Confers Protection From High Salt to Consomic Dahl S Rat, 456
Renin Gene Transfer Restores Angiogenesis and Vascular Endothelial Growth Factor Expression in Dahl S Rats, 386

Circadian rhythm
Alterations in Blood Pressure and Heart Rate Variability in Transgenic Rats With Low Brain Angiotensinogen, 408

Circulation
AT_1 Antisense Distinguishes Receptors Mediating Angiotensin II Actions in Solitary Tract Nucleus, 1292
Structural Vascular Changes in Hypertension: Role of Angiotensin II, Dietary Sodium Supplementation, and Sympathetic Stimulation, Alone and in Combination in Rats, 255

Clinical trials
Baseline Characteristics and Early Blood Pressure Control in the CONVINCE Trial, 12
Baseline Characteristics of Participants in the Antihypertensive and Lipid Lowering Treatment to Prevent Heart Attack Trial (ALLHAT), 19
Predominance of Isolated Systolic Hypertension Among Middle-Aged and Elderly US Hypertensives: Analysis Based on National Health and Nutrition Examination Survey (NHANES) III, 869

Clonidine
Nitric Oxide and Central Antihypertensive Drugs: One More Difference Between Catecholamines and Imidazolines, 246

Co-amilozide
Arterial Calcification and Calcium Antagonists: What Does It Mean?, 1414
Calcium Channel Blocker Nifedipine Slows Down Progression of Coronary Calcification in Hypertensive Patients Compared With Diuretics, 1410

Collagen
Antifibrotic Effects of N-Acetyl-Seryl-Aspartyl-Lysyl-Proline on the Heart and Kidney in Aldosterone-Salt Hypertensive Rats, 794
Editorial Commentary: Regulation of Cardiac Collagen: Angiotensin and Cross-Talk With Local Growth Factors, 841
Effect of Extracellular Matrix Elements on Angiotensin II-Induced Calcium Release in Vascular Smooth Muscle Cells From Normotensive and Hypertensive Rats, 1465
Effect of N-Acetyl-Seryl-Aspartyl-Lysyl-Proline on DNA and Collagen Synthesis in Rat Cardiac Fibroblasts, 827
Regression of Renal Vascular Fibrosis by Endothelin Receptor Antagonism, 490
Role of Myocytes in Myocardial Collagen Production, 833
Workshop: Endothelial Cell Dysfunction Leading to Diabetic Nephropathy: Focus on Nitric Oxide, 744

Compliance
Peripheral "Oscillatory" Compliance Is Associated With Aortic Augmentation Index, 1434

Computed tomography
Arterial Calcification and Calcium Antagonists: What Does It Mean?, 1414
Calcium Channel Blocker Nifedipine Slows Down Progression of Coronary Calcification in Hypertensive Patients Compared With Diuretics, 1410

Contraction
Oxidized-LDL Enhances Coronary Vasoconstriction by Increasing the Activity of Protein Kinase C Isoforms α and ϵ, 561
Role of Endothelin B Receptors in Enhancing Endothelium-Dependent Nitric Oxide-Mediated Vascular Relaxation During High Salt Diet, 516

Coronary artery disease
Increased 2-Methoxyestradiol Production in Human Coronary Versus Aortic Vascular Cells, 658

Rat Coronary Endothelial Cell Membrane Potential Responses During Hypertension, 66
Coronary calcification
Editorial Commentary: Arterial Calcification and Calcium Antagonists: What Does It Mean?, 1414
Calcium Channel Blocker Nifedipine Slows Down Progression of Coronary Calcification in Hypertensive Patients Compared With Diuretics, 1410
Cortisol
Fluid Shear Stress Reduces 11β-Hydroxysteroid Dehydrogenase Type 2, 160
Creatinine
Prognostic Significance of Serum Creatinine and Uric Acid in Older Chinese Patients With Isolated Systolic Hypertension, 1069
Cyclic AMP
Endogenous Cyclic AMP-Adenosine Pathway Regulates Cardiac Fibroblast Growth, 1095
Cyclic GMP
NO Inhibits NaCl Absorption by Rat Thick Ascending Limb Through Activation of cGMP-Stimulated Phosphodiesterase, 467
Therapeutic Actions of a New Synthetic Vasoactive and Natriuretic Peptide, Dendroaspis Natriuretic Peptide, in Experimental Severe Congestive Heart Failure, 1089
Cyclooxygenase
Differential Inhibition of Functional Dilation of Small Arterioles by Indomethacin and Glibenclamide, 599
Long-Term Glucose Infusion Increases Arterial Pressure in Dogs With Cyclooxygenase-2 Inhibition, 733
Role of Cyclooxygenase-2-Derived Metabolites and NO in Renal Response to Bradykinin, 129
Cytochrome
20-Hydroxyeicosatetraenoic Acid Mediates Angiotensin II-Induced Phospholipase D Activation in Vascular Smooth Muscle Cells, 623
Cytoskeleton
Fluid Shear Stress Reduces 11β-Hydroxysteroid Dehydrogenase Type 2, 160

D

Denervation
Degeneration of Capsaicin-Sensitive Sensory Nerves Leads to Increased Salt Sensitivity Through Enhancement of Sympathoexcitatory Response, 440
Dynamic Analysis of Renal Nerve Activity Responses to Baroreceptor Denervation in Hypertensive Rats, 1153
Deoxycorticosterone
Effect of Chronic Blockade of the Kallikrein-Kinin System on the Development of Hypertension in Rats, 121
Effects of Angiotensin-Converting Enzyme Inhibitor and Angiotensin Type 1 Receptor Antagonist in Deoxycorticosterone Acetate-Salt Hypertensive Mice Lacking Ren-2 Gene, 974
Diabetes mellitus
A Defect in Glycogen Synthesis Characterizes Insulin Resistance in Hypertensive Patients With Type 2 Diabetes, 1492
β_2-Adrenergic Receptor Gene Variation and Hypertension in Subjects With Type 2 Diabetes, 1303
Diabetes, Hypertension, and Cardiovascular Disease: An Update, 1053
Effect of Antihypertensive Therapy on Renal Artery Structure in Type 2 Diabetic Rats With Hypertension, 1273
Expression and Function of Peroxisome Proliferator-Activated Receptor-γ in Mesangial Cells, 722
Polymorphisms in the *hANP* (Human Atrial Natriuretic Peptide) Gene, Albuminuria, and Hypertension, 1416
Workshop: Endothelial Cell Dysfunction Leading to Diabetic Nephropathy: Focus on Nitric Oxide, 744
Diastole
Adverse Cardiac Effects of Salt With Fludrocortisone in Hypertension, 856
Maternal Diastolic Dysfunction and Left Ventricular Geometry in Gestational Hypertension, 1209
Diet
Abnormal Platelet Function and Calcium Handling in Dahl Salt-Hypertensive Rats, 1129
Ascorbic Acid Status and Subsequent Diastolic and Systolic Blood Pressure, 261
Central Leptin Infusion Attenuates the Cardiovascular and Metabolic Effects of Fasting in Rats, 663
Editorial Commentary: BBs and Buffets: The Impact of Dietary Factors on Blood Pressure, 268
Inhibition of NO Synthesis Enhances Chronic Cardiovascular and Renal Actions of Leptin, 670
Oxidative Stress in a Rat Model of Obesity-Induced Hypertension, 554
Dipyridamole
Abnormal Renal Vascular Responses to Dipyridamole-Induced Vasodilation in Spontaneously Hypertensive Rats, 894
Diuretics
Baseline Characteristics of Participants in the Antihypertensive and Lipid Lowering Treatment to Prevent Heart Attack Trial (ALLHAT), 19
C825T Polymorphism of the G Protein β_3-Subunit and Antihypertensive Response to a Thiazide Diuretic, 739
Mutations in the Na-Cl Cotransporter Reduce Blood Pressure in Humans, 1458
K^+ Depletion and the Progression of Hypertensive Disease or Heart Failure: The Pathogenic Role of Diuretic-Induced Aldosterone Secretion, 806
DNA
Responses to Central Na^+ and Ouabain Are Attenuated in Transgenic Rats Deficient in Brain Angiotensinogen, 683
Dopamine
Angiotensin II Increases Vesicular Trafficking in Brain Neurons, 677
Drug therapy

Coronary Hemodynamic and Ventricular Responses to Angiotensin Type 1 Receptor Inhibition in SHR: Interaction With Angiotensin Type 2 Receptors, 1399
Effect of Antihypertensive Therapy on Renal Artery Structure in Type 2 Diabetic Rats With Hypertension, 1273
Hemodynamic Overload-Induced Activation of Myocardial Mitogen-Activated Protein Kinases In Vivo: Augmented Responses in Young Spontaneously Hypertensive Rats and Diminished Responses in Aged Fischer 344 Rats, 52
Norepinephrine Reuptake Is Impaired in Skeletal Muscle of Hypertensive Rats In Vivo, 698
Pharmacodynamic Contribution to the Vasodialtor Effect of Chronic AT_1 Receptor Blockade in SHR, 91

Rats, spontaneously hypertensive
Abnormal Renal Vascular Responses to Dipyridamole-Induced Vasodilation in Spontaneously Hypertensive Rats, 894
Antisense Inhibition of Thyrotropin-Releasing Hormone Reduces Arterial Blood Pressure in Spontaneously Hypertensive Rats, 365
The Future of Hypertension Therapy: Sense, Antisense, or Nonsense? 357
HMG-CoA Reductase Inhibitors Improve Endothelial Dysfunction in Normocholesterolemic Hypertension via Reduced Production of Reactive Oxygen Species, 1450
Impaired β-Adrenergic Hyperpolarization in Arteries From Prehypertensive Spontaneously Hypertensive Rats, 609
Nerve Growth Factor Enhances Calcitonin Gene-Related Peptide Expression in the Spontaneously Hypertensive Rat, 728
Pulse Pressure, Aortic Reactivity, and Endothelium Dysfunction in Old Hypertensive Rats, 313
Reciprocal Consomic Strains to Evaluate Y Chromosome Effects, 391
Superoxide Inhibits Neuronal Nitric Oxide Synthase Influences on Afferent Arterioles in Spontaneously Hypertensive Rats, 630
Y-Chromosome Transfer Induces Changes in Blood Pressure and Blood Lipids in SHR, 1147

Rats, stroke-prone SHR
Renal Endothelin ET_A/ET_B Receptor Imbalance Differentiates Salt-Sensitive From Salt-Resistant Spontaneous Hypertension, 275

Reactive oxygen species
Editorial Commentary: Aging and Systolic Hypertension: Cluster Patterns and Problem-Solving Strategies to Answer the Genetic Riddle, 1067
HMG-CoA Reductase Inhibitors Improve Endothelial Dysfunction in Normocholesterolemic Hypertension via Reduced Production of Reactive Oxygen Species, 1450
Hypothesis: Pulse Pressure and Human Longevity, 1060
Reactive Oxygen Species-Mediated Homologous Downregulation of Angiotensin II Type 1 Receptor mRNA by Angiotensin II, 535

Receptors
γ-Aminobutyric Acid (GABA)-A Function and Binding in the Paraventricular Nucleus of the Hypothalamus in Chronic Renal-Wrap Hypertension, 614
Angiotensin II Signaling to Phospholipase D in Renal Microvascular Smooth Muscle cells in SHR, 635
Cardiomyocytes Bind and Activate Native Human Prorenin: Role of Soluble Mannose 6-Phosphate Receptors, 710
Differential Distribution of Bradykinin B_2 Receptors in the Rat and Human Cardiovascular System, 110
Effect of Chronic Blockade of the Kallikrein-Kinin System on the Development of Hypertension in Rats, 121
Endothelial Dysfunction and Xanthine Oxidoreductase Activity in Rats With Human Renin and Angiotensinogen Genes, 414
Mineralocorticoid Receptor Affects AP-1 and Nuclear Factor-κB Activation in Angiotensin II-Induced Cardiac Injury, 787
Role of Angiotensin and Its Inhibition in Hypertension, Ischemic Heart Disease, and Heart Failure, 342
Tyrosine Kinase Involvement in Renal Arteriolar Constrictor Responses to Angiotensin II, 569

Receptors, adenosine
Antiadrenergic Effects of Adenosine in Pressure Overload Hypertrophy, 862

Receptors, adrenergic
β_2-Adrenergic Receptor Gene Variation and Hypertension in Subjects With Type 2 Diabetes, 1303
Association Analysis of β_2-Adrenergic Receptor Polymorphisms With Hypertension in Japanese, 286
Impaired β-Adrenergic Hyperpolarization in Arteries From Prehypertensive Spontaneously Hypertensive Rats, 609
Impaired Insulin-like Growth Factor I Vasorelaxant Effects in Hypertension, 1480

Receptors, adrenomedullin
Alterations of Intrarenal Adrenomedullin and Its Receptor System in Heart Failure Rats, 216

Receptors, angiotensin
Angiotensin II and Its Metabolites Stimulate PAI-1 Protein Release From Human Adipocytes in Primary Culture, 1336
Angiotensin II Increases Vesicular Trafficking in Brain Neurons, 677
Angiotensin II Relaxes Microvessels Via the AT_2 Receptor and Ca^{2+}-Activated K^+ (BK_{Ca}) Channels, 301
AT_1 Antisense Distinguishes Receptors Mediating Angiotensin II Actions in Solitary Tract Nucleus, 1292
Differentiation of Brain Angiotensin Type 1a and 1b Receptor mRNAs: A Specific Effect of Dehydration, 692
Effect of Valsartan on Angiotensin II-Induced Plasminogen Activator Inhibitor-1 Biosynthesis in Arterial Smooth Muscle Cells, 961
Effects of Angiotensin-Converting Enzyme Inhibitor and Angiotensin Type 1 Receptor Antagonist in Deoxycorticosterone Acetate-Salt Hypertensive Mice Lacking Ren-2 Gene, 974
Endothelial Dysfunction and Salt-Sensitive Hypertension in Spontaneously Diabetic Goto-Kakizaki Rats, 433
Neural Mechanisms Subserving Central Angiotensinergic Influences on Plasma Renin in Sheep, 1375
Reactive Oxygen Species-Mediated Homologous Downregulation of Angiotensin II Type 1 Receptor mRNA by Angiotensin II, 535
Vascular Effects of ACE Inhibition Independent of the Renin-Angiotensin System in Hypertensive Renovascular Disease: A Randomized, Double-Blind, Crossover Trial, 40

Receptors, angiotensin II
Angiotensin-(1-7) Downregulates the Angiotensin II Type 1 Receptor in Vascular Smooth Muscle Cells, 1141
Prevention of Hypertension by Irbesartan in Dahl S Rats Relates to Central Angiotensin II Type 1 Receptor Blockade, 981
Selective Inhibition of the Renal Angiotensin Type 2 Receptor Increases Blood Pressure in Conscious Rats, 1285

Receptors, endothelin
Endothelin Type A Receptor Blockade Attenuates the Hypertension in Response to Chronic Reductions in Uterine Perfusion Pressure, 485
Renal Endothelin ET_A/ET_B Receptor Imbalance Differentiates Salt-Sensitive From Salt-Resistant Spontaneous Hypertension, 275

Receptors, lipoprotein
8-iso-Prostaglandin $F_{2\alpha}$ Increases Expression of LOX-1 in JAR Cells, 1184

Record linkage, medical
Cancer Incidence in Hypertensive Patients in North Karelia, Finland, 1251

Regional blood flow
Abnormal Renal Vascular Responses to Dipyridamole-Induced Vasodilation in Spontaneously Hypertensive Rats, 894

Remodeling
A_{2B} Receptors Mediate the Antimitogenic Effects of Adenosine in Cardiac Fibroblasts, 716
Effects of an Angiotensin-Converting Enzyme Inhibitor and a β-Blocker on Cerebral Arteriolar Dilatation in Hypertensive Rats, 1388

Effects of Angiotensin-Converting Enzyme Inhibitor and Angiotensin Type 1 Receptor Antagonist in Deoxycorticosterone Acetate-Salt Hypertensive Mice Lacking Ren-2 Gene, 974
Endogenous Cyclic AMP-Adenosine Pathway Regulates Cardiac Fibroblast Growth, 1095
Estradiol Metabolites Inhibit Endothelin Synthesis by an Estrogen Receptor-Independent Mechanism, 640
Expression of Cell Cycle Proteins in Blood Vessels of Angiotensin II-Infused Rats: Role of AT_1 Receptors, 604
Fenestrations of the Carotid Internal Elastic Lamina and Structural Adaptation in Stroke-Prone Spontaneously Hypertensive Rats, 1101
Inhibition of Neointima by Angiotensin-Converting Enzyme Inhibitor in Porcine Coronary Artery Balloon-Injury Model, 270
Reduced Hypoxic Pulmonary Vascular Remodeling by Nitric Oxide From the Endothelium, 322
Src Tyrosine Kinases and Extracellular Signal-Regulated Kinase 1/2 Mitogen-Activated Protein Kinases Mediate Pressure-Induced C-Fos Expression in Cannulated Rat Mesenteric Small Arteries, 955

Renal blood flow
Mycophenolate Mofetil Reduces Renal Injury in the Chronic Nitric Oxide Synthase Inhibition Model, 170
Reduced Uterine Perfusion Pressure During Pregnancy in the Rat Is Associated With Increases in Arterial Pressure and Changes in Renal Nitric Oxide, 1191

Renal disease
Activation of NF-κB in Tubular Epithelial Cells of Rats With Intense Proteinuria: Role of Angiotensin II and Endothelin-1, 1171
Effects of Estradiol and Its Metabolites on Glomerular Endothelial Nitric Oxide Synthesis and Mesangial Cell Growth, 645
Hypotensive and Natriuretic Actions of Adrenomedullin in Subjects With Chronic Renal Impairment, 1279

Renal injury
Effects of Angiotensin-Converting Enzyme Inhibitor and Angiotensin Type 1 Receptor Antagonist in Deoxycorticosterone Acetate-Salt Hypertensive Mice Lacking Ren-2 Gene, 974

Renal nerves
Central Orexin-A Augments Sympathoadrenal Outflow in Conscious Rabbits, 1382
Dynamic Analysis of Renal Nerve Activity Responses to Baroreceptor Denervation in Hypertensive Rats, 1153
Neural Mechanisms Subserving Central Angiotensinergic Influences on Plasma Renin in Sheep, 1375
Sodium Intake Influences Hemodynamic and Neural Responses to Angiotensin Receptor Blockade in Rostral Ventrolateral Medulla, 1114

Renin
Captopril Suppression vs Salt Loading in Confirming Primary Aldosteronism, 1440
Cardiomyocytes Bind and Activate Native Human Prorenin: Role of Soluble Mannose 6-Phosphate Receptors, 710
Evaluating a Model of an NRE-Mediated Tissue-Specific Expression of Murine Renin Genes, 105
Hypotensive and Natriuretic Actions of Adrenomedullin in Subjects With Chronic Renal Impairment, 1279
Increased Oxidative Stress in Experimental Renovascular Hypertension, 541
Neural Mechanisms Subserving Central Angiotensinergic Influences on Plasma Renin in Sheep, 1375
Paradoxical Regulation of Short Promoter Human Renin Transgene by Angiotensin II, 403
Therapeutic Actions of a New Synthetic Vasoactive and Natriuretic Peptide, Dendroaspis Natriuretic Peptide, in Experimental Severe Congestive Heart Failure, 1089
Thyroid Hormone Stimulates Renin Gene Expression Through the Thyroid Hormone Response Element, 99

Renin-angiotensin system
Alterations in Blood Pressure and Heart Rate Variability in Transgenic Rats With Low Brain Angiotensinogen, 408
Antisense Inhibition of Brain Renin-Angiotensin System Decreased Blood Pressure in Chronic 2-Kidney, 1 Clip Hypertensive Rats, 371
Baroreflex Improvement in SHR after ACE Inhibition Involves Angiotensin-(1-7), 1309
Differentiation of Brain Angiotensin Type 1a and 1b Receptor mRNAs: A Specific Effect of Dehydration, 692
The Future of Hypertension Therapy: Sense, Antisense, or Nonsense?, 357
Impaired Sodium Excretion During Mental Stress in Mild Essential Hypertension, 923
Long-Term Glucose Infusion Increases Arterial Pressure in Dogs With Cyclooxygenase-2 Inhibition, 733
p38 MAP Kinase Regulates Vascular Smooth Muscle Cell Collagen Synthesis by Angiotensin II in SHR But Not in WKY, 574
Potentiation of Bradykinin by Angiotensin-(1-7) on Arterioles of Spontaneously Hypertensive Rats Studied In Vivo, 703
Prevention of Hypertension by Irbesartan in Dahl S Rats Relates to Central Angiotensin II Type 1 Receptor Blockade, 981
Renin Gene Transfer Restores Angiogenesis and Vascular Endothelial Growth Factor Expression in Dahl S Rats, 386
Role of Angiotensin and Its Inhibition in Hypertension, Ischemic Heart Disease, and Heart Failure, 342

Resistance
Vasopeptidase Inhibition Prevents Endothelial Dysfunction of Resistance Arteries in Salt-Sensitive Hypertension in Comparison With Single ACE Inhibition, 28

Reverse transcriptase-polymerase chain reaction
Decreased Renal Expression of Nitric Oxide Synthase Isoforms in Adrenocorticotropin-Induced and Corticosterone-Induced Hypertension, 1164
Enhancement of Angiotensinogen Expression in Angiotensin II-Dependent Hypertension, 1329

RhoA
Angiotensin II Signaling to Phospholipase D in Renal Microvascular Smooth Muscle cells in SHR, 635

Risk factors
ACE D/I Polymorphism and Incidence of Post-PTCA Restenosis: A Prospective, Angiography-Based Evaluation, 851
Alcohol Consumption and the Incidence of Hypertension: The Atherosclerosis Risk in Communities Study, 1242
Cardiovascular Mortality in Hypertensive Men According to Presence of Associated Risk Factors, 1256
Determinants of Spontaneous Baroreflex Sensitivity in a Healthy Working Population, 911
T+31C Polymorphism of Angiotensinogen Gene and Essential Hypertension, 281
Tissue Angiotensin and Pathobiology of Vascular Disease: A Unifying Hypothesis, 1047

RNA
Decreased Renal Expression of Nitric Oxide Synthase Isoforms in Adrenocorticotropin-Induced and Corticosterone-Induced Hypertension, 1164
Nerve Growth Factor Enhances Calcitonin Gene-Related Peptide Expression in the Spontaneously Hypertensive Rat, 728

S

Shaker potassium channels
Differential Expression of Voltage-Gated K^+ Channel Genes in Arteries From Spontaneously Hypertensive and Wistar-Kyoto Rats, 1315

Shear stress
Fluid Shear Stress Reduces 11β-Hydroxysteroid Dehydrogenase Type 2, 160

Sibling
β_2-Adrenergic Receptor Gene Variation and Hypertension in Subjects With Type 2 Diabetes, 1303

Signal transduction
Salicylate Inhibits Phosphorylation of the Nonreceptor Tyrosine Kinases, Proline-Rich Tyrosine Kinase 2 and c-Src, 148
Signaling Events Mediating the Additive Effects of Oleic Acid and Angiotensin II on Vascular Smooth Muscle Cell Migration, 308
Src Tyrosine Kinases and Extracellular Signal-Regulated Kinase 1/2 Mitogen-Activated Protein Kinases Mediate Pressure-Induced C-Fos Expression in Cannulated Rat Mesenteric Small Arteries, 955

Smoking
Association Between Smoking and Blood Pressure: Evidence From the Health Survey for England, 187

Effects of Blood Pressure, Smoking, and Their Interaction on Carotid Artery Structure and Function, 6
Effects of Smoking Cessation on Changes in Blood Pressure and Incidence of Hypertension: A 4-Year Follow-Up Study, 194
Sodium
Abnormal Platelet Function and Calcium Handling in Dahl Salt-Hypertensive Rats, 1129
Adverse Cardiac Effects of Salt With Fludrocortisone in Hypertension, 856
Alterations of Intrarenal Adrenomedullin and Its Receptor System in Heart Failure Rats, 216
Brown Norway Chromosome 13 Confers Protection From High Salt to Consomic Dahl S Rat, 456
Effect of Chronic Blockade of the Kallikrein-Kinin System on the Development of Hypertension in Rats, 121
Endothelial Dysfunction in Salt-Sensitive Essential Hypertension, 444
Impaired Sodium Excretion During Mental Stress in Mild Essential Hypertension, 923
Leptin Acts in the Central Nervous System to Produce Dose-Dependent Changes in Arterial Pressure, 936
Marinobufagenin, an Endogenous α-1 Sodium Pump Ligand, in Hypertensive Dahl Salt-Sensitive Rats, 462
NO Inhibits NaCl Absorption by Rat Thick Ascending Limb Through Activation of cGMP-Stimulated Phosphodiesterase, 467
Renal Endothelin ET_A/ET_B Receptor Imbalance Differentiates Salt-Sensitive From Salt-Resistant Spontaneous Hypertension, 275
Responses to Central Na^+ and Ouabain Are Attenuated in Transgenic Rats Deficient in Brain Angiotensinogen, 683
Role of Brain Angiotensin II on Somatosensory-Induced Antinatriuresis in Hypertensive Rats, 1369
Salt Sensitivity, Pulse Pressure, and Death in Normal and Hypertensive Humans, 429
Sodium-lithium countertransport
Sodium-Lithium Countertransport Activity Is Linked to Chromosome 5 in Baboons, 398
Sodium pump
Marinobufagenin, an Endogenous α-1 Sodium Pump Ligand, in Hypertensive Dahl Salt-Sensitive Rats, 462
Structure-Activity Relationships for the Hypertensinogenic Activity of Ouabain: Role of the Sugar and Lactone Ring, 472
Sodium, dietary
Captopril Suppression vs Salt Loading in Confirming Primary Aldosteronism, 1440
Degeneration of Capsaicin-Sensitive Sensory Nerves Leads to Increased Salt Sensitivity Through Enhancement of Sympathoexcitatory Response, 440
Endothelial Dysfunction in Salt-Sensitive Essential Hypertension, 444
Enhancement of Angiotensinogen Expression in Angiotensin II-Dependent Hypertension, 1329
Mutations in the Na-Cl Cotransporter Reduce Blood Pressure in Humans, 1458
Normal Blood Pressure and Renal Function in Mice Lacking the Bradykinin B_2 Receptor, 1473
Sodium Intake Influences Hemodynamic and Neural Responses to Angiotensin Receptor Blockade in Rostral Ventrolateral Medulla, 1114
Solitary tract nucleus
AT_1 Antisense Distinguishes Receptors Mediating Angiotensin II Actions in Solitary Tract Nucleus, 1292
Spironolactone
Mineralocorticoid Receptor Affects AP-1 and Nuclear Factor-κB Activation in Angiotensin II-Induced Cardiac Injury, 787
Statins
HMG-CoA Reductase Inhibitors Improve Endothelial Dysfunction in Normocholesterolemic Hypertension via Reduced Production of Reactive Oxygen Species, 1450
Stress
Impaired Sodium Excretion During Mental Stress in Mild Essential Hypertension, 923
Workshop: Hypertension and Cardiovascular Risk Factors: Role of the Angiotensin II-Nitric Oxide Interaction, 767
Stress, oxidative
Increased Oxidative Stress in Experimental Renovascular Hypertension, 541
Stroke
Prognostic Significance of Serum Creatinine and Uric Acid in Older Chinese Patients With Isolated Systolic Hypertension, 1069
Reciprocal Consomic Strains to Evaluate Y Chromosome Effects, 391
Submandibular gland
Evaluating a Model of an NRE-Mediated Tissue-Specific Expression of Murine Renin Genes, 105
Superoxide
Angiotensin-(1-7)-Stimulated Nitric Oxide and Superoxide Release From Endothelial Cells, 72
Endothelial Dysfunction and Xanthine Oxidoreductase Activity in Rats With Human Renin and Angiotensinogen Genes, 414
Synergistic Antihypertensive Effects of Nifedipine on Endothelium: Concurrent Release of NO and Scavenging of Superoxide, 34
Sympathectomy
Animal Model of Neuropathic Tachycardia Syndrome, 1357
Degeneration of Capsaicin-Sensitive Sensory Nerves Leads to Increased Salt Sensitivity Through Enhancement of Sympathoexcitatory Response, 440
Sympathetic nervous system
Adenosine, a Metabolic Trigger of the Exercise Pressor Reflex in Humans, 917
γ-Aminobutyric Acid (GABA)-A Function and Binding in the Paraventricular Nucleus of the Hypothalamus in Chronic Renal-Wrap Hypertension, 614
Hypotensive and Natriuretic Actions of Adrenomedullin in Subjects With Chronic Renal Impairment, 1279
Leptin Acts in the Central Nervous System to Produce Dose-Dependent Changes in Arterial Pressure, 936
Role of Brain Angiotensin II on Somatosensory-Induced Antinatriuresis in Hypertensive Rats, 1369
Syndrome X
Reversibility of Chronic Experimental Syndrome X by Diet Modification, 1323

T

Tachycardia
Animal Model of Neuropathic Tachycardia Syndrome, 1357
Telemetry
Comparative Effects of Selective T- and L-Type Calcium Channel Blockers in the Remnant Kidney Model, 1268
Telomere
Excess Growth and Apoptosis: Is Hypertension a Case of Accelerated Aging of Cardiovascular Cells? 760
Hypothesis: Pulse Pressure and Human Longevity, 1060
Telomeres
Editorial Commentary: Aging and Systolic Hypertension: Cluster Patterns and Problem-Solving Strategies to Answer the Genetic Riddle, 1067
Tempol
Long-Term Antioxidant Administration Attenuates Mineralocorticoid Hypertension and Renal Inflammatory Response, 781
Superoxide Inhibits Neuronal Nitric Oxide Synthase Influences on Afferent Arterioles in Spontaneously Hypertensive Rats, 630
Systemic and Regional Hemodynamic Responses to Tempol in Angiotensin II-Infused Hypertensive Rats, 77
Tetraethylammonium chloride
C-Type Natriuretic Peptide-Induced Vasodilation Is Dependent On Hyperpolarization in Human Forearm Resistance Vessels, 1179
Tetrahydrobiopterin
Endothelin Antagonism Uncovers Insulin-Mediated Vasorelaxation In Vitro and In Vivo, 328
Transcription
Activation of Cardiac c-Jun NH_2-Terminal Kinases and p38-Mitogen-Activated Protein Kinases With Abrupt Changes in Hemodynamic Load, 1222
Mitogenic and Antiapoptotic Actions of Hepatocyte Growth Factor Through ERK, STAT3, and Akt in Endothelial Cells, 581
Transport
NO Inhibits NaCl Absorption by Rat Thick Ascending Limb Through Activation of cGMP-Stimulated Phosphodiesterase, 467
Trophoblast
8-iso-Prostaglandin $F_{2\alpha}$ Increases Expression of LOX-1 in JAR Cells, 1184

Tubuloglomerular feedback
Renal Interstitial ATP Responses to Changes in Arterial Pressure During Alterations in Tubuloglomerular Feedback Activity, 753
Twins
Genetic Influences on Baroreflex Function in Normal Twins, 907
Twins in Cardiovascular Genetic Research, 350

U

Ultrasonography
Quantification of Mechanical and Neural Components of Vagal Baroreflex in Humans, 1362
Uric acid
Prognostic Significance of Serum Creatinine and Uric Acid in Older Chinese Patients With Isolated Systolic Hypertension, 1069
Urination
Dipping Status May Be Determined by Nocturnal Urination, 749

V

Valsartan
Effect of Valsartan on Angiotensin II-Induced Plasminogen Activator Inhibitor-1 Biosynthesis in Arterial Smooth Muscle Cells, 961
Vascular diseases
Contribution of Bcl-2, but Not Bcl-xL and Bax, to Antiapoptotic Actions of Hepatocyte Growth Factor in Hypoxia-Conditioned Human Endothelial Cells, 1341
Vascular reactivity
Impaired Insulin-like Growth Factor I Vasorelaxant Effects in Hypertension, 1480
Vasculature
Abnormal Renal Vascular Responses to Dipyridamole-Induced Vasodilation in Spontaneously Hypertensive Rats, 894
Expression of Cell Cycle Proteins in Blood Vessels of Angiotensin II-Infused Rats: Role of AT_1 Receptors, 604
Tissue Angiotensin and Pathobiology of Vascular Disease: A Unifying Hypothesis, 1047
Vasodilation
Ascorbic Acid-Induced Modulation of Venous Tone in Humans, 949
Endothelin Antagonism Uncovers Insulin-Mediated Vasorelaxation In Vitro and In Vivo, 328
Epoxyeicosatrienoic Acid-Mediated Renal Vasodilation to Arachidonic Acid Is Enhanced in SHR, 887
Exclusion of the ACE D/I Gene Polymorphism as a Determinant of Endothelial Dysfunction, 293
Insulin-Induced Biphasic Responses in Rat Mesenteric Vascular Bed: Role of Endothelin, 1298
Interactive Effect of Ethnicity and ACE Insertion/Deletion Polymorphism on Vascular Reactivity, 46
Vasodilator agents
Angiotensin-(1-7) Does Not Affect Vasodilator or TPA Responses to Bradykinin in Human Forearm, 1136
Vasopeptidase
Vasopeptidase Inhibition Prevents Endothelial Dysfunction of Resistance Arteries in Salt-Sensitive Hypertension in Comparison With Single ACE Inhibition, 28
Vasopressins
Evidence That Reduced Renal Medullary Nitric Oxide Synthase Activity of Dahl S Rats Enables Small Elevations of Arginine Vasopressin to Produce Sustained Hypertension, 524
Veins
Ascorbic Acid-Induced Modulation of Venous Tone in Humans, 949
Ventricular function, left
Arterial Pressure, Left Ventricular Mass, and Aldosterone in Essential Hypertension, 845
Maternal Diastolic Dysfunction and Left Ventricular Geometry in Gestational Hypertension, 1209
Relation of Age to Left Ventricular Function and Systemic Hemodynamics in Uncomplicated Mild Hypertension, 1404
Silent ST Depression and Cardiovascular End-Organ Damage in Newly Found, Older Hypertensives, 1083
Verapamil
Baseline Characteristics and Early Blood Pressure Control in the CONVINCE Trial, 12
Vitamins
Ascorbic Acid-Induced Modulation of Venous Tone in Humans, 949
Vitronectin
Effect of Extracellular Matrix Elements on Angiotensin II-Induced Calcium Release in Vascular Smooth Muscle Cells From Normotensive and Hypertensive Rats, 1465

W

Wave reflections
A Comparison Between Systolic and Diastolic Pulse Contour Analysis in the Evaluation of Arterial Stiffness, e15
Western blot
Enhancement of Angiotensinogen Expression in Angiotensin II-Dependent Hypertension, 1329
Windkessel model
A Comparison Between Systolic and Diastolic Pulse Contour Analysis in the Evaluation of Arterial Stiffness, e15
Women
Effect of Estrogen Replacement Therapy on Endothelial Function in Peripheral Resistance Arteries in Normotensive and Hypertensive Postmenopausal Women, 651
Vascular Stiffness in Women With Systemic Lupus Erythematosus, 1075

X

Xanthine
Endothelial Dysfunction and Xanthine Oxidoreductase Activity in Rats With Human Renin and Angiotensinogen Genes, 414
